

Checksum Calculating Algorithm for DL580&DL9130

SetBaud 9600bps

Packet Type	Station Num	Length	Command Code	Command Data	Checksum
0xA5	0xFF	3	0x74	02	cc

Calculate CheckSum when reader identify single EPC tag:

$$A5+FF+03+74+02+CC=0$$

$$cc=0-A5-FF-03-74-02=E3$$

Through the computation , we can know the CheckSum is E3

A5 FF 03 74 02 E3
